1 Introducing BD Reauthor Pro

1.1 Overview

Overview

BD Reauthor Pro is a powerful tool for demuxing and reauthoring Blu-ray Discs. The main function of BD Reauthor Pro is the decompiling of Blu-ray Discs in order to create complete Sonic Scenarist BD projects, including all the required asset files (video, audio, etc.) BD Reauthor Pro allows the avoidance of past authoring work being duplicated, making it an invaluable time saving tool in a professional BD workflow. As BD Reauthor supports

Blu-ray Discs created using any authoring software, it also ensures that your Sonic Scenarist license can be used to reauthor any Blu-ray Disc, no matter what was used to create it. BD Reauthor Pro's user interface is designed to promote ease of use, without compromising on the amount of information made available. The internal structure of a Blu-ray Disc can be viewed in detail, including all logical fields created by the original authoring software.

BD Reauthor Pro is capable of exceptional processing speeds, demuxing an entire dual layer Blu-ray Disc in approximately 1 hour (depending on workstation specifications). BD Reauthor Pro outputs a detailed log of operations, allowing you to keep track of what is happening every step of the way.

1.2 Features

Features

The key features that make BD Reauthor a truly unique BD Tool:

- Automatic processing a complete Blu-ray Discs or any selected .m2ts file
- Support for all video and audio types supported by Blu-ray Disc Support for all video and audio types supported by Blu-Ray Disc
- Support for all subtitle streams (Presentation Graphic) supported by Blu-ray Disc
- Support for complete menu (Interactive Graphic) stream extraction, including PNG images, positioning and page structure
- Well structured Sonic Scenarist project output including and all required assets and metadata files
- Complete processing of a dual layer Blu-ray Disc in approximately 2 hour

1.3 System Requirements and Usage Restrictions

System Requirements

A CPU meeting the following minimum requirements is recommended for use with BD Reauthor Pro:

Microsoft Windows XP (Home, Professional or Media Center Edition)
Microsoft Windows 2000
Microsoft Windows Vista
Intel Core 2 Quad Q9450 (2.66 GHz)
2 GB DDR2 SDRAM
NVIDIA GeForce 9800GT 512 MB
100 GB of hard drive space for application files and Sonic Scenarist project files*
Microsoft .NET Framework 2.0
Sonic Scenarist BD**

* The amount of hard drive space required for Sonic Scenarist project files will depend on the size of the Blu-ray Disc being processed.

** Sonic Scenarist BD is required to generate the metadata files needed for the Scenarist project. This process is performed by the MUI Generator, which may be launched after installation without requiring your Scenarist dongle.

Recommended Storage

The overall speed of BD Reauthor is largely governed by the speed of the storage being used. To achieve maximum processing efficiency, it is recommended that the source and destination drives are part of a high-bandwidth storage solution, such as a RAID array.

Usage Restrictions

BD Reauthor Pro is not intended for use with Blu-ray Disc titles for which you have not obtained the proper authorization. It cannot break cryptoprotection or any other type of copy protection. BD Reauthor Pro is intended to help Blu-ray Disc authors in the reworking of BD projects by allowing the retrieval of the original assets. BD Reauthor Pro does not violate any intellectual property rights, as it can only be used with Blu-ray Discs that do not contain copy protection.

2 Using BD Reauthor Pro

2.1 Getting started

Getting started

Starting work immediately with BD Reauthor Pro is an easy and simple process

1. Launch BD Reauthor Pro
2. Click "Open BD" and specify the folder containing the BDMV Volume.

3. Go to Options window and set up a destination path for the demuxed data.

4. Click "Demux all" button to start the Demux process.

5. Once BD Reauthor has finished processing the Blu-ray Disc, you can open the created project immediately from within Scenarist BD.

2.2 User interface

The picture below shows the three main elements to the BD Reauthor interface.

MPEG-2 Transport Stream List

After the initial parsing of a BDMV volume, this list will contain all of the present .m2ts files and their sizes.

Disc Structure Window

After the initial parsing stage, it is possible to browse the complete structure of the BDMV volume within this window.

Log Window

The Log Window keeps track of each operation performed by BD Reauthor. It allows you to see the time spent processing and gives useful information describing errors, should they occur. The text from the Log Window can be saved and restored to and from disk. Each line of text in the Log Window includes the time it appeared and an icon showing its information type.

3 The Settings Menu

3.1 Path

Select path for demuxed data

Select destination folder for extracted BD data

This button allows you to select one of last four specified folders or one of four default folders for this source BDMV volume. After you have selected the folder the total capacity and free space for this disk will be displayed.

Set destination folder automatically after BD was opened

This option allows BD Reauthor to automatically set the destination folder.

When processing a BDMV volume stored on BD-R/E, BD Reauthor will create a destination folder on the hard disk with the most free space remaining. The name of the destination folder will be the same as the name of the folder containing the BDMV volume.

When processing a BDMV volume stored on hard disk, BD Reauthor will use the source folder as the destination folder.

Set destination folder as it is

This option leaves the destination folder as it was specified manually.

Set destination folder as subfolder

This option creates a subfolder for the demuxed data within the specified folder.

3.2 Demux

PCM-WAV processing

Divide PCM into channels

This option specifies that demuxed PCM streams should be divided into mono WAV files, where a different WAV file is created for each channel. If this option is not selected, demuxed PCM streams will be represented by a single WAV file containing all of the channels.

Delete raw PCM files after WAV creation

This option specifies that the original PCM files can be deleted as part of the demuxing process, after the necessary WAV files have been created.

Interactive and Presentation

Automatic Graphic stream processing

This option specifies whether subtitle streams (PES files) and menu streams (IES files) should be converted to PNG files automatically. It is possible to convert PES and IES files after the initial demux using the 'Graphic Stream Converter' tool in the Operations menu.

Presentation graphic

Leave picture sizes the same as Video

This option specifies that all subtitle graphics created should be the same size as the Primary Video resolution. Most authoring applications will only import subtitle graphics if their size matches the Primary Video resolution. Sonic Scenarist will automatically crop images of this type, but can also import images that have already been cropped.

3.3 Menu files

Menu files layout

Copy PNG files according to Button folders

This option specifies whether to create a menu graphic folder structure that matches the one used by Sonic Scenarist Designer PS. If this option is deselected, all PNG files will be created within a single folder.

N.B. Both options create menu assets that can imported into Sonic Scenarist.

Create PNG files for buttons layout

This option specifies that, as part of the menu stream processing, additional PNG files should be created showing a composited view of each display state of every menu page.

3.4 UI

This tab shows the colors used to represent each stream type in the Disc Structure Window.

Clicking on any current color will open a dialog allowing that color to be changed.

3.5 Scanner

Limitations for exit

N.B. In most cases, the settings in this section will not need to be changed and can be left as their default values.

Number of Program Maps

The number of Program Maps BD Reauthor will scan before moving on to the next MPEG-2 Transport Stream.

Number of bytes read

The number of bytes BD Reauthor reads into an MPEG-2 Transport Stream in order to detect the available data streams.

3.6 Logic parsing

Clip Info files parsing

Skip parsing of internal Clip information (fines and coarses)

This option specifies the level of detail required when parsing the Clip Information files.

When selected, BD Reauthor will parse only the minimum amount of information required to successfully demux the MPEG-2 Transport Streams.

This will result in less information being available in the Clip tree after the initial parsing of the BDMV volume.

3.7 Scenarist

MUI Generator

Select path to MUI Generator executable file.

All video and audio files need to be processed using a tool called the MUI Generator before they can be imported into a Scenarist project. The MUI Generator is installed as part of Scenarist, but does not require a Scenarist dongle in order to run. BD Reauthor can use the MUI Generator to process the required files automatically, as part of the demuxing process.

This setting specifies the path to the MUIGenerator.exe file. It defaults to the standard Scenarist installation path, and so in most cases will not require changing.

Project file for Scenarist

Do not generate XML project file for Scenarist.

This option specifies whether you require a Scenarist project or not. When selected, BD Reauthor will not create a Scenarist project.

3.8 Corrections

XML project corrections

This tab contains options for fixing various errors which sometimes occur in Blu-ray Discs that were not created using Sonic Scenarist. To ensure the final project is compatible with Scenarist, it is recommended that you allow BD Reauthor to correct any problems found. All corrections are made according to the appropriate Blu-ray Disc Specification. It is possible to view all corrections made in the Log Window.

Video parameters is different between PlayItems.

This option specifies whether BD Reauthor should ensure all streams within a PlayList have the same framerate. If framerates are found to differ between streams within the PlayList, BD Reauthor will use the framerate assigned to the Primary Video stream.

When all the Secondary Audio and/or interactive sound entries non fields in STN_tables, the Audio Mix App Flag is set to [Not Applied Secondary Audio/Interactive Sound].

This option specifies whether BD Reauthor should check the "Audio Mix App Flag" property in each PlayList is set correctly, and fix errors when found.

PlayItem time is out of range of Clip time.

This option specifies whether BD Reauthor should check that all PlayItem time ranges are correct according to the corresponding Clip, and fix errors when found.

Add intermediate Movie Object for Titles with the same linked Object.

This option specifies whether BD Reauthor should ensure that no Title solely references Movie Objects shared with other Titles. Where necessary, Movie Objects will be duplicated to ensure this is the case.

Connection condition state for PlayItems in PlayList

This option specifies how BD Reauthor should handle PlayItems that are connected seamlessly.

Not change

BD Reauthor will make no changes to seamlessly connected PlayItems.

Always not seamless

BD Reauthor will change all seamless PlayItem connections to non-seamless.

Align PlayItem in seamless

If PlayItems have seamless connections, BD Reauthor will ensure that the PlayItems IN and OUT times are equal to the relevant Clips Presentation Start and End times. Where this is not the case, BD Reauthor will change the appropriate PlayItem IN and OUT times.

Monitor the corrections in Log

This option specifies whether information detailing any corrections made is displayed in the Log Window.

4 The Operations Menu

4.1 Graphic Stream converter

The Graphic Stream Parser can be used to analyze, and export PNG graphics from, any type of BD graphic stream - PES (Subpictures) or IES (Interactive menu). It can also be used to browse the properties of each object within the graphics stream structure.

To parse a PES or IES stream, click on "Open PGS + Tree" (or select "Open IES/PES..." from the File menu) and select the graphics stream file.

The Graphic Stream parser can perform two types of error checking on an opened stream:

1. You can detect references to buttons that do not exist in the currently opened stream.
2. You can detect whether any objects (PNG graphics) present are not used by the graphics stream.

The Graphic Stream parser can open any PES or IES file, it is not limited to opening files created using BD Reauthor.

4.2 Color converter

The Color converter can be used to convert YCrCb color values to RGB color values, using BD Reauthor's color conversion formula.

4.3 Times converter

The screenshot shows a software window titled "Times converter" with a standard Windows-style title bar (blue with a close button). The window has a light beige background and contains several input fields and buttons. On the left, under the heading "PTS to Time", there are three input fields labeled "PTS:", "Frames:", and "Frames:" (likely a typo for "Frames"). Each field contains the number "0". To the right of these are four input fields labeled "Hours:", "Minutes:", "Seconds:", and "Frames:", each also containing "0". On the far right, there are two buttons: "Convert PTS -> Time" and "Convert Time -> PTS". Below these, there is a section titled "Frames per second" with a grid of radio buttons. The first column has radio buttons for 23.976, 24, 25, and 29.97. The second column has radio buttons for 30, 50, 59.94, and 60. The "23.976" radio button is selected. To the right of this section is a "Drop/Non drop" section with two radio buttons: "Non drop" (selected) and "Drop". On the far right, there are two more buttons: "Convert Frames -> Time" and "Convert Time -> Frames". At the bottom right corner of the window is a "Close" button.

The Times Converter is a tool which can be used to convert between the three different time formats used by Blu-ray Discs: time code, frames and Presentations Time Stamp.

The four functions provided are:

1. PTS to time code.
2. Time code to PTS.
3. Frames to Time code.
4. Time code to frames.

The time code format used is HH:MM:SS:FF

4.4 Divide AC3/MLP

The Divide AC3/MLP tool can be used to split Dolby TrueHD (or Lossless) streams into their respective AC3 and MLP files.

Whilst de-muxing, BD-Reauthor performs this process automatically for all Dolby TrueHD streams.

4.5 WAV, AC3, DTS information

The audio information tools can be used to extract and display information about audio files.

The information displayed includes bitrate, sample rate and channel configuration.

5 License

The license - BD Reauthor Pro 2.0 Full version

Copyright (C) 2004-2009 DVDLogic Software. All rights reserved.

END-USER LICENSE AGREEMENT – DVDLogic

THIS IS A CONTRACT; PLEASE READ IT CAREFULLY. BY INSTALLING THIS SOFTWARE YOU ACCEPT ALL THE TERMS AND CONDITIONS OF THIS AGREEMENT, AND YOU WILL NOT BE ABLE TO USE THIS SOFTWARE UNLESS YOU ACCEPT THIS AGREEMENT. BY USING THE SOFTWARE, YOU ARE AGREEING TO BE BOUND BY THE TERMS OF THIS LICENSE. IF YOU DO NOT AGREE TO ANY TERM OR CONDITION, YOU MAY NOT INSTALL OR RUN THIS SOFTWARE.

1. License. DVDLogic hereby grants to the purchaser (hereafter "you") a personal, non-exclusive, non-transferable license (the "License"), without the right to sublicense, to use the application, installation, utility, system, upgrade or other software accompanying this License, whether on disk, in read only memory, or on any other media (the "BD Reauthor Software"), the related documentation and materials. The BD Reauthor Software is licensed for use in object code form only, for your internal use and only on a specific hardware system. The BD Reauthor Software is licensed, not sold, to you. You own the media on which the BD Reauthor Software is recorded but DVDLogic retains title to the BD Reauthor Software and to any copies which this License authorizes you to make. You acknowledge that DVDLogic retains all other ownership rights connected with the BD Reauthor Software, including, without limitation, all copyrights, trademark rights, and all other intellectual property rights. You agree to refrain from any action which would diminish such rights or would call them into question. You agree that this License shall apply to any DVDLogic software provided to you by Sonic Solutions ("Sonic") acting as a reseller of DVDLogic products, or Sonic's representative as replacement or upgrade software to substitute for or to be used in conjunction with the software accompanying this License.

2. Permitted Uses and Restrictions. This License allows you to install and use the BD Reauthor Software on a single hardware system at a time. This License does not allow the BD Reauthor Software to exist on more than one hardware system at a time. You may make one copy of the BD Reauthor Software in machine-readable form for backup purposes only. The backup copy must include all copyright notices and any other proprietary legends contained on the original copy of the BD Reauthor Software. Except as permitted by applicable law and this License, you may not decompile, reverse engineer, disassemble, modify, rent, lease, loan, distribute, create derivative works from the BD Reauthor Software or publish or transmit the BD Reauthor Software over a network. You may, however, transfer your rights under this License, provided you transfer the related documentation, this License, and a copy of the BD Reauthor Software to a party who agrees to accept the terms of this License and destroy any other copies of the BD Reauthor Software in your possession. Your rights under this License will terminate automatically without notice if you fail to comply with any term(s) of this License. The BD Reauthor Software is not intended for use with Blu-ray Disc titles for which you have not obtained the proper authorization, and cannot break cryptoprotection or any other type of copy protection.

The BD Reauthor Software is intended to help Blu-ray Disc authors in the reworking of BD projects by allowing the retrieval of the original assets. The BD Reauthor Software can only be used with Blu-ray Discs that do not contain copy protection. The BD Reauthor Software may not be used for authoring of unlicensed Blu-ray discs.

3. Limited Warranty on Media. DVDLogic warrants the media on which the BD Reauthor Software is delivered to be free from defects in materials and workmanship under normal use for a period of ninety (90) days from the date of original purchase. Your exclusive remedy under this paragraph shall be, at DVDLogic's (or its resellers') sole option, either of (i)a refund of the purchase price of the media containing the BD Reauthor Software or (ii)a replacement copy of the BD Reauthor Software, provided that your original copy is returned to DVDLogic or a DVDLogic authorized representative.

THIS LIMITED WARRANTY AND ANY IMPLIED WARRANTIES ON THE MEDIA INCLUDING THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE LIMITED IN DURATION TO NINETY (90) DAYS FROM THE DATE OF ORIGINAL RETAIL PURCHASE. SOME JURISDICTIONS DO NOT ALLOW LIMITATIONS ON HOW LONG AN IMPLIED WARRANTY LASTS, SO THIS LIMITATION MAY NOT APPLY TO YOU. THE LIMITED WARRANTY SET FORTH HEREIN IS EXCLUSIVE AND IN LIEU OF ALL OTHERS, WHETHER ORAL OR WRITTEN, EXPRESS, OR IMPLIED. SONIC SPECIFICALLY DISCLAIMS ALL OTHER WARRANTIES. THIS LIMITED WARRANTY GIVES YOU SPECIFIC LEGAL RIGHTS, AND YOU MAY ALSO HAVE OTHER RIGHTS WHICH VARY BY JURISDICTION.

4. Disclaimer of Warranty on DVDLogic Software. YOU EXPRESSLY ACKNOWLEDGE AND AGREE THAT USE OF THE BD REAUTHOR SOFTWARE IS AT YOUR SOLE RISK AND THAT THE ENTIRE RISK AS TO SATISFACTORY QUALITY, PERFORMANCE, ACCURACY AND EFFORT IS WITH YOU. THE BD REAUTHOR SOFTWARE IS PROVIDED "AS IS" AND WITHOUT WARRANTY OF ANY KIND AND EXCEPT FOR THE LIMITED WARRANTY ON MEDIA SET FORTH ABOVE AND TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, DVDLOGIC AND ITS LICENSORS AND RESELLERS EXPRESSLY DISCLAIM ALL WARRANTIES, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE WITH RESPECT TO THE BD REAUTHOR SOFTWARE. DVDLOGIC AND ITS LICENSORS AND RESELLERS DO NOT WARRANT THAT THE FUNCTIONS CONTAINED IN THE BD REAUTHOR SOFTWARE WILL MEET YOUR REQUIREMENTS, OR THAT THE OPERATION OF THE BD REAUTHOR SOFTWARE WILL BE UNINTERRUPTED OR ERROR-FREE, OR THAT DEFECTS IN THE BD REAUTHOR SOFTWARE WILL BE CORRECTED. FURTHERMORE, DVDLOGIC AND ITS LICENSORS AND RESELLERS DO NOT WARRANT OR MAKE ANY REPRESENTATIONS REGARDING THE USE OR THE RESULTS OF THE USE OF THE BD REAUTHOR SOFTWARE OR RELATED DOCUMENTATION IN TERMS OF THEIR CORRECTNESS, ACCURACY, RELIABILITY, OR OTHERWISE. NO ORAL OR WRITTEN INFORMATION OR ADVICE GIVEN BY DVDLOGIC OR A DVDLOGIC AUTHORIZED REPRESENTATIVE OR RESELLER SHALL CREATE A WARRANTY OR IN ANY WAY INCREASE THE SCOPE OF THIS WARRANTY. SHOULD THE BD REAUTHOR SOFTWARE PROVE DEFECTIVE, YOU (AND NOT DVDLOGIC, ITS LICENSORS OR AN AUTHORIZED REPRESENTATIVE OR RESELLER) ASSUME THE ENTIRE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION. SOME JURISDICTIONS DO NOT ALLOW THE EXCLUSION OF IMPLIED WARRANTIES, SO THE ABOVE EXCLUSION MAY NOT APPLY TO YOU.

5. Third Party Works. To the extent that any third party's intellectual property is incorporated within the BD Reauthor Software, you agree that such third party is a third-party beneficiary of the terms of this EULA to the extent of the third party's license to DVDLogic, and that you will not use any such third party's intellectual property for any purpose other than the promotion of DVDLogic products or the process of learning to use the BD Reauthor Software.

6. Limitation of Liability. TO THE MAXIMUM EXTENT NOT PROHIBITED BY LAW, IN NO EVENT SHALL DVDLOGIC OR ITS LICENSORS OR RESELLERS BE LIABLE FOR PERSONAL INJURY, OR ANY INCIDENTAL, SPECIAL, INDIRECT OR CONSEQUENTIAL DAMAGES WHATSOEVER, INCLUDING, WITHOUT LIMITATION, DAMAGES FOR LOSS OF PROFITS, LOSS OF DATA, BUSINESS INTERRUPTION OR ANY OTHER COMMERCIAL DAMAGES OR LOSSES, ARISING OUT OF OR RELATED TO YOUR USE OR INABILITY TO USE THE BD REAUTHOR SOFTWARE, HOWEVER CAUSED, REGARDLESS OF THE THEORY OF LIABILITY (CONTRACT, TORT OR OTHERWISE) AND EVEN IF DVDLOGIC AND/OR ITS LICENSORS AND/OR RESELLERS HAVE BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. SOME JURISDICTIONS DO NOT ALLOW THE LIMITATION OF LIABILITY FOR PERSONAL INJURY, OR OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THIS LIMITATION MAY NOT APPLY TO YOU. IN NO EVENT SHALL DVDLOICG'S AND/OR ITS LICENSORS' AND/OR RESELLERS' TOTAL LIABILITY TO YOU FOR ALL DAMAGES (OTHER THAN AS MAY BE REQUIRED BY APPLICABLE LAW IN CASES INVOLVING PERSONAL INJURY) EXCEED THE AMOUNT PAID FOR THIS BD REAUTHOR SOFTWARE. THE FOREGOING LIMITATIONS WILL APPLY EVEN IF THE ABOVE STATED REMEDY FAILS OF ITS ESSENTIAL PURPOSE. ANY UNAUTHORIZED USE OR ATTEMPTED USE OF THE BD REAUTHOR SOFTWARE IS AT YOUR SOLE RISK, AND DVDLOGIC AND ITS LICENSORS AND RESELLERS SHALL HAVE NO LIABILITY THEREFOR.

7. Export Law Restrictions. You agree that the BD Reauthor Software will not be exported outside the United States except as authorized by United States law. You also agree that BD Reauthor Software that has been rightfully obtained outside of the United States shall not be exported except as authorized by the laws of the United States and of the jurisdiction in which the BD Reauthor Software was obtained.

8. Controlling Law and Severability. This License shall be governed by the laws of the United States and the State of California. This License shall not be governed by the United Nations Convention on Contracts for the International Sale of Goods, the application of which is expressly excluded. If for any reason a court of competent jurisdiction finds any provision, or portion thereof, to be unenforceable, the remainder of this License shall continue in full force and effect.

9. Complete Agreement. This License constitutes the entire agreement between the parties with respect to the use of the BD Reauthor Software and supersedes all prior or contemporaneous understandings regarding such subject matter. No amendment to or modification of this License will be binding unless in writing and signed by DVDLogic or its authorized representatives.

6 Support and service

Support on the web

If you have specific questions about using BD Reauthor that aren't answered by the documentation, please contact Sonic support by following the links at:

<http://support.sonic.com>
